

WAGO AUTOMATION

Engineering Software

e!COCKPIT is an integrated development environment that supports every automation task from hardware configuration, programming, simulation and visualization up to commissioning – in just one software package. Completely reimagined, this development environment enables users to easily master complex automation networks, saving both time and money.

Operation and Monitoring

Operate, observe, visualize, diagnose in production and process industry: WAGO's web and control panels for small to medium-sized control and visualization tasks feature perfect usability and with the quickly created visualizations, set the focus on time savings.

As the leader in screwless interconnect and electronic interface technologies, WAGO developed the first finely modular, fieldbus-independent I/O system in 1995. To this day, our steadfast commitment to innovation and versatility enables us to continue setting new standards in usability, performance and reliability. A compact design combined with the highest quality standards has made the WAGO-I/O-SYSTEM one of the world's most decentralized I/O systems.

I/O-SYSTEMS

At WAGO you will find the exact I/O components you need: whether it is industrial, process or building automation, sensitive safety applications, telecontrol or in hazardous areas. WAGO's 750 Series and 750 XTR I/O-Systems reliably collect and transfer all signals in your installation. International certifications mean that these systems can be used worldwide for virtually any industry.

Infrastructure

In the field of industrial automation, more and more wireless technologies, such as mobile radio, *Bluetooth*® and WLAN, supplement data transmission via fieldbus or industrial ETHERNET systems. This is complemented by the economic industrial switches, which reliably transmit data traffic and protect against network failures. WAGO's sensor/actuator boxes are the perfect choice for signal acquisition at the machine level. The *TO-PASS*® product family also offers modular and scalable remote solutions.

Controllers

WAGO offers programmable controllers in a wide variety of performance classes for performing any automation task. And, they can be used for both centralized and decentralized applications. For decentralized control tasks, the WAGO controllers can be incorporated into the most prevalent fieldbus networks and

they record all field signals via I/O modules.

WAGO's IEC 61131-3 programmable controllers perform a variety of automation tasks, while providing all the benefits of standard PLC technology (e.g., strength, stability, reliability and high availability).

WAGO-I/O-SYSTEM 750

One System for Every Application

The WAGO-I/O-SYSTEM 750/753 is characterized by its universal application scope and extensive product portfolio. With more than 500 different modules, the versatility and flexibility is so great that virtually every requirement in a wide range of industries is covered.

Whether it's industrial, process or building auto-

mation, sensitive safety applications, telecontrol or in hazardous areas: The WAGO-I/O-SYSTEM 750 provides the decentralized periphery required. International certifications such as IECEx, UL61010 or ABS, as well as several additional marine approvals mean that WAGO's I/O-System can be used worldwide for virtually any industry.

ADVANTAGES:

- Fieldbus-independent – Support all standard fieldbus protocols and ETHERNET standards
- Flexible platform adapts to diverse applications and environments
- Tested and approved worldwide
- Wide range of accessories for marking and connection technology
- CAGE CLAMP® connection technology for vibration-proof, fast and maintenance-free connections

WAGO-I/O-SYSTEM 750 XTR

Taking It to the eXTReMe – The Standard for 750 XTR

The WAGO-I/O-SYSTEM 750 XTR is instantly recognizable by its dark gray housings. Extremely temperature-resistant, immune to interference, as well as unfazed by vibrations and impulse voltages – the WAGO-I/O-SYSTEM 750 XTR's unique features make it ideal for extreme environments.

WAGO's 750 XTR is the first choice for demanding applications including:

- Marine systems and onshore/offshore installations
- Renewable energy systems (wind turbines, solar systems and biogas plants)
- Transformer stations and power distribution systems
- Petrochemical industry
- Water and wastewater treatment systems
- Custom machines
- Railway applications

ADVANTAGES:

- Based on 750 Series
- No air conditioning required
- Compact footprint
- Lower energy and maintenance costs
- Can be used in unshielded areas
- Use in hazardous locations

UNIVERSAL, COMPACT, ECONOMICAL

The Ideal Fieldbus Node

Maximum Fieldbus Independence

The system's modularity is also reflected in its support for numerous fieldbus systems and ETH-ERNET standards. Depending on the application, it is possible to choose between fieldbus couplers and communication modules for different protocols.

Worldwide Approvals

International approvals for building and industrial automation, as well as the process and marine industries, guarantee worldwide use – even under harsh operating conditions. These recognitions include: ATEX, BR-Ex, IECEx, UL, UL ANSI/ISA and numerous marine certifications.

Clear Identification

Module functionality is identified via integrated or pluggable marker carriers. Terminal assignment and technical data are printed onto the side of the I/O module.

The WAGO WSB marker system also allows for module- and channel-related identification.

Extremely Compact

WAGO's patented mechanical design leads to extremely compact I/O nodes. In fact, select I/O modules can accommodate up to 16 channels in a 12 mm (1/2") wide housing.

The finely granular and space-saving I/O modules provide both node customization and high I/O integration density.

Pluggable Connections

For the ultimate convenience, 753 Series Modules are 100% compatible with the 750 Series and feature pluggable connectors. A detachable wiring interface allows an operator to easily replace a module without removing and then rewiring all pre-existing wiring. This convenience virtually eliminates installation errors and saves time, providing flexible and time-saving final assembly via pre-wired connectors.

Maximum Reliability and Ruggedness

The WAGO I/O-SYSTEM is engineered and tested for use in the most demanding environments in accordance with the highest standards, e.g., those required in marine applications. The system is distinguished from other products that are solely intended for industrial use because of:

- Greatly increased vibration rating
- Significantly greater immunity to interference (ESD)
- Lower emission of interference
- Larger voltage fluctuation range
- Greater strength for continuous operation in upper temperature ranges

In addition, CAGE CLAMP® spring pressure connections ensure superior reliability. Integrated QA measures in the production process and 100 % function testing ensure consistent quality.

Maximum Flexibility

Each node in the WAGO I/O-SYSTEM can be configured to meet every channel's requirements; various potentials and signal types are available (granularity of 1–16 channels). Digital and analog I/O modules, as well as specialty modules, can be freely mixed in the same node. Supply modules permit different voltages within the same node.

Easy to Use

A modular, DIN-rail-mount design permits easy installation, expansion and modification of the I/O module without tools. The straightforward design prevents installation errors. In addition, proven CAGE CLAMP® technology offers fast, vibration-proof and maintenance-free connections that are independent of operator skill. Depending on the I/O module's granularity, field peripherals can be directly wired using 1-, 2-, 3- or 4-wire technology.

MORE THAN 500 I/O MODULES AVAILABLE

1-, 2-, 4-, 8- and 16-Channel

Digital Input Modules

- 2-Channel Digital Input**
 - 24, 48, 60, 110, 220 VDC
 - 120, 230 VAC
 - NPN/PNP, 0.2 ms/3.0 ms filter, diagnostics
- 2-Channel Digital Specialty Modules**
 - NAMUR
 - Pulse extension
 - Intruder detection
 - Up/down counter, 500 Hz, 100 kHz
- 4-Channel Digital Input**
 - 5, 24, 42 VDC
 - 24, 42 VAC, 110 ... 230 VAC
- 8-Channel Digital Input**
 - 24 VDC, 5 ... 14 VDC
 - NPN/PNP, 0.2/3.0 ms, filter
 - PTC
- 16-Channel Digital Input**
 - Push-in CAGE CLAMP®, 24 VDC, NPN/PNP
 - Ribbon cable, 24 VDC, NPN/PNP

Digital Output Modules

- 1-Channel Digital Output**
 - 440 VAC, 16 A
 - Manual operation, bistable
- 2-Channel Digital Output**
 - 24 VDC, 0.5 A/2 A, diagnostics (broken wire/short circuit)
 - 230 VAC, SSR, 3.0 A, diagnostics
- 4-Channel Digital Output**
 - 5, 24 VDC, 0.5 A
 - 120 ... 230 VAC, 0.25 A
 - NPN/PNP, diagnostics
- 8-Channel Digital Output**
 - 5 ... 14 VDC, 1 A
 - 24 VDC, 0.5 A
 - NPN/PNP, diagnostics
- 16-Channel Digital Output**
 - Push-in CAGE CLAMP®, 24 VDC, 0.5 A, NPN/PNP
 - Ribbon cable, 24 VDC, 0.5 A
- 2-Channel Relay Output**
 - 0 ... 230 VAC/DC
 - 2 make contacts/2 changeover contacts, isolated outputs/non-floating
- 4-Channel Relay Output**
 - 4 make contacts

Analog Input Modules

- 1-Channel Analog Input**
 - Resistor bridge (strain gauge)
- 2-Channel Analog Input**
 - 0/4 ... 20 mA, 0 ... 1/5 A AC/DC
 - 0 ... 10 VDC, ±10 V, 0 ... 30 VDC
 - Thermocouples
 - Resistance measurement (RTD)
 - Differential/single-ended input
 - Measurement input (electrical isolation)
 - Modules with HART protocol
- 4-Channel Analog Input**
 - 0/4 ... 20 mA
 - 0 ... 10 V, ±10 V
 - Resistance measurement (RTD)
 - Single-ended input
- 8-Channel Analog Input**
 - 0 ... 10 V, ±10 V
 - 0/4 ... 20 mA
 - Thermocouples
 - Resistance measurement (RTD)
 - Single-ended input
 - Push-in CAGE CLAMP® connection technology
- 3-Phase Power Measurement**
 - 480/690 V, 1 A/5 A/Rogowski coil

IEC 60870-5-101/-103/-104
IEC 61850
IEC 61400-25
DNP3

Analog Output Modules

2-Channel Analog Output

- 0 ... 10 V/±10 V
- 0/4 ... 20 mA

4-Channel Analog Output

- 0 ... 10 V/±10 V
- 0/4 ... 20 mA

8-Channel Analog Output

- 0 ... 10 V/±10 V

Analog Specialty Modules

- 6 ... 18 V
- 0 ... 10 V, 10 mA, diagnostics

Function and Technology Modules

Counter Modules

- Up/down counters
- Frequency counter
- Peak-time counter

Distance and Angle Measurement

- SSI Transmitter Interface
- Incremental encoder interface
- Digital impulse interface

Positioning

- Stepper controller, RS-422
- Stepper controller, 24 V/1.5 A
- Stepper controller, 70 V/7.5 A, 6IN/2OUT
- Servo stepper controller, 70 V/7.5 A, 6IN/2OUT
- DC drive controller, 24 V/5 A

Pulse Width Output

Proportional Valve Module

- Control of hydraulic or pneumatic valves

Vibration Monitoring

- Vibration velocity/bearing condition monitoring

RTC Module

- DCF77 radio receiver

WIDE VARIETY OF I/O MODULES FOR VIRTUALLY ANY APPLICATION

Communication Modules

Building Automation

- DALI Multi-Master
- EnOcean radio receiver
- MP-Bus
- KNX/EIB/TP1 interface
- LON®
- SMI
- M-Bus

Serial Interfaces

- RS-232-/RS-485 interface (configurable)
- TTY interface, 20 mA, current loop
- Serial data exchange interface

4-Channel I/O-Link Master

AS-Interface Master

- Per (M4) V 3.0 specification
- Up to 62 slaves

CAN Gateway

Radio Interface

- *Bluetooth*® RF Transceiver

Functional Safety

Fail-Safe Digital Input PROFIsafe

- 4FDI, 24 VDC
- 8FDI, 24 VDC
- PLe/Cat. 4 to EN ISO 13849 or SIL 3 EN IEC 62061

Fail-Safe Digital Input/Output PROFIsafe

- 4FDI/2FDO, 24 VDC, 10 A
- 4FDI/4FDO, 24 VDC, 0.5 A
- 4FDI/4FDO, 24 VDC, 2 A
- 4FDI/4FRO, 48 VAC, 60 VDC, 6 A

Intrinsically Safe Digital Input

- 4 F Ex i DI, 24 VDC, Zones 0+1

Supply and Segment Modules

Local Bus Extension

- End module
- Coupler module

Supply Module

- 0 ... 230 VAC/DC
- Fuse/diagnostics (optional)
- 24 VDC/5 ... 15 VDC (adjustable)

Filter Module

- System and field supply
- 24 VDC power supply filter with overvoltage (surge) protection

Field Side Connection Module

- 24 VDC
- 0 VDC

Spacer Module

- 24 VDC / 230 VAC

End Module

4-Channel Digital Output

- Valves

2-Channel Relay Output

- 2 changeover contacts

2-Channel Analog Input

- 4 ... 20 mA
- 4 ... 20 mA, HART
- Resistance measurement (RTD)
- Thermocouples

4-Channel Analog Input

- 0/4 ... 20 mA, 3.6 ... 21 mA (NE43)

2-Channel Analog Output

- 0 ... 20 mA
- 4 ... 20 mA

Up/down counters

- 20 Hz ... 50 kHz

Supply Module

- 24 VDC, 1 A

eXTreme TEMPERATURES

from -40°C to $+70^{\circ}\text{C}$

ADVANTAGES:

- No air conditioning required
- Compact footprint
- Lower energy and maintenance costs

Superior Reliability in Extreme Climates

Automation systems are increasingly being located in outdoor and remote locations where components are directly affected by widely fluctuating temperatures and weather conditions (e.g., wind turbines, rolling stock and transformer stations).

Regardless of freezing cold, extreme heat and high humidity, the WAGO-I/O-SYSTEM 750 XTR is engineered for absolute dependability in virtually any weather. As the robust variant of the WAGO-I/O-SYSTEM 750, XTR is unfazed by both freezing cold down to -40°C and scorching heat up to $+70^{\circ}\text{C}$. And this applies equally to both start-up and continual operation.

The maximum approved **operating altitude of 5,000 m** is another highlight. Even in the thin air of a mountain-top station, the system impressively demonstrates its high performance and availability.

WAGO's 750 XTR helps minimize space requirements by offering a compact footprint, but the savings go well beyond cabinet dimensions. XTR does not require additional heating/cooling equipment, which significantly reduces both energy consumption and maintenance costs. This brings four major benefits to your operation: No configuration, purchase, follow-up costs and space for extra air-conditioning are required.

eXTReMe VIBRATION RESISTANCE

Up to 5g of Acceleration

ADVANTAGES:

- Install close to vibrating and shock-generating system components
- Increased system uptime
- Maximum return on investment

High Mechanical Performance

Automation systems must be particularly vibration-resistant, especially when installed close to vibration-prone and shock-generating system components. Powerful motors and power circuit breakers are just two examples from a wide field of torturous applications.

The WAGO-I/O-SYSTEM 750 XTR is also setting new standards: With **5g of vibration resistance** per DIN EN 60068-2-6 (acceleration: 50 m/s²) and **15g (150 m/s²) of shock resistance**, as well as **25g (250 m/s²) of continuous shock resistance**

per IEC 60068-2-27, the system is engineered for dependability – no matter what.

Count on long-lasting, trouble-free operation and industry-topping levels of safety – even in the most severe applications, such as tunnel boring machines.

The extreme ruggedness of the 750 XTR Series pays off twice, maximizing both uptime and investment security to save you time and give you peace of mind.

eXTreme INTRINSIC SAFETY

Signal Acquisition and Transmission in Zones 0 and 1

ADVANTAGES:

- Safely and easily connect sensors and actuators of zones 0/20 and 1/21 under extreme conditions
- ATEX and IECEx approvals for use world-wide

Intrinsically Safe Signal Acquisition

The intrinsic safety of a device or system is a technical property which, due to special design principles, ensures that even in the event of an error, an unsafe condition does not occur. This property is particularly important for devices that are used in hazardous areas such as the oil or gas industry.

The WAGO I/O-SYSTEM 750 XTR can be used either outside of hazardous areas and within zone 2/22 inside an approved enclosure. The 750 XTR Series also offers the right intrinsic I/O modules for every field device, all of which have the ATEX/IECEx approval for use in zone 2/22.

Besides the standard signals from the sensors and actuators from zone 2/22, intrinsically safe sensors and actuators from zones 0/20 and 1/21 can also be integrated via the I/O modules in the blue enclosure. Thus, the 750 XTR Series also allows applications to be implemented in an intrinsically safe area under extreme conditions.

FIELDBUS-INDEPENDENT

The Right Fieldbus Coupler and Controller for Every Application

Fieldbus Couplers

- Fieldbus couplers connect the WAGO-I/O-SYSTEM 750 to a higher-level control system
- Fieldbus-independent – Support all standard fieldbus protocols and ETHERNET standards
- Space-saving design
- For eXTReMe environments

750 Series Controllers

- Controllers for all prominent fieldbus systems and ETHERNET standards
- Quick start-up
- Programmable via CODESYS per IEC 61131-3
- Directly connect to a wide range of I/O modules within the WAGO-I/O-SYSTEM 750
- Flexible platform adapts to diverse applications and environments
- For eXTReMe environments

PFC Controllers

- High processing speed and large selection of interfaces
- Cost-effective configuration via **e!COCKPIT (CODESYS 3)** Engineering Software
- Best investment protection due to scalable control technology
- Linux® real-time operating system
- High level security with TLS, SSH, VPN and a firewall
- For eXTReme environments

APPLICATIONS

Industrial and Mechanical Engineering

The comprehensive selection of I/O modules for different potentials and signal types saves time and money as the sensors/actuators can be wired directly – even in safety-related applications.

Technical Highlights:

- Fieldbus-independent solutions with scalable performance for major fieldbus systems and industrial Ethernet standards
- Cost- and space-saving design with 1-, 2-, 4-, 8- and 16-channels per I/O module

- Functional safety according to PLe/Cat. 4 per EN ISO 13849 or SIL3 EN IEC 62061
- Application-specific specialty functions, such as positioning, condition monitoring and much more
- Wide range of interfaces (e.g., CAN, IO-Link, AS-Interface and much more)
- Current and energy measurement technology for energy consumption calculation

Energy

The main objective of the power generation and distribution industry is to ensure the reliable and safe supply of power. With an extensive product portfolio, WAGO offers customers a broad spectrum of application possibilities: from the automation of energy generation plants and energy distribution to safe remote solutions, as well as energy monitoring and control with I/O components for current and energy measurement technology.

Technical Highlights:

- Scalable controllers and telecontrol technology
- Communication per IEC 60870-5-

101/-103/-104, 61850, 61400-25, DNP3

- PFC hardening is possible in compliance with the German Energy and Water Industry (BDEW) Whitepaper
- Current and energy measurement technology for extensive network analysis
- Gateway functionality with interfaces to all common fieldbus systems
- 750 XTR benefits:
 - Temperature-resistant: -40 ... +70°C
 - Isolation up to 5 kV of impulse voltage (DIN EN 60870-2-1)
 - Vibration resistance up to 5g of acceleration (DIN EN 60068-2-6)

Building

The broad portfolio enables flexible, cellar-to-ceiling solutions with conventional I/O modules, standardized industry-specific fieldbus protocols and subsystems for typical applications in lighting, shading, heating, HVAC and much more.

Technical Highlights:

- Fully integrated building automation with BACnet/IP, BACnet MS/TP, KNX IP and Modbus TCP
- Fast and efficient solutions for all building systems due to freely programmable controllers and application-specific function blocks
- Continuous networking and remote access, e.g., using Web-based technologies
- Wide range of building automation interfaces (e.g., KNX, LON®, DALI, EnOcean, SMI, MP-Bus and much more.)

Process

Even under the harshest environmental conditions, use is possible with special approvals. Potential hazardous location applications include oil and gas production, the chemical industry and power generation. The WAGO-I/O-SYSTEM can be installed in Zone 2/22 with its intrinsically safe I/O modules, making it possible to connect sensors/actuators in zones 1/21 and 0/20.

Technical Highlights:

- Intrinsically safe analog and digital I/O modules for connection to zones 0/20 and 1/21
- All in one module: functional safety and explosion protection
- Numerous specialty and analog functions (RTD, TC, AC/DC), NAMUR, as well as extensive diagnostics (e.g., short circuits, wire breakage and out-of-measurement range)
- Different potentials can be supplied within one node
- HART protocol support
- Certified to ATEX, IECEx, UL ANSI/ISA 12.12.01, UL, GOST-R and more
- Intrinsically safe I/O modules as XTR variants

APPLICATIONS

Marine and Offshore

Both shipbuilding and onshore/offshore applications are particularly demanding of the performance capability and availability of components. Our I/O components for marine applications stand up to the most extreme environments.

The I/O systems used in shipbuilding are put to the test in the most punishing operating environments. For example, constant vibrations, shock loads, extreme temperature cycling and severe humidity continuously assault the components placed in a ship's engine room. Still, WAGO components meet ever-increasing demands for electromagnetic compatibility day in and day out, year after year.

Technical Highlights:

- Media redundancy controller
- Media redundancy provides high

operational reliability

- Operation in two separate networks
- 750 XTR benefits:
 - Temperature resistance: $-40 \dots +70^{\circ}\text{C}$
 - Isolation up to 5 kV of impulse voltage (DIN EN 60870-2-1)
 - Vibration resistance up to 5g of acceleration (DIN EN 60068-2-6)
- International approvals: DNV-GL, LR, BV, RINA, KR, NK, ABS, PRS
- Environmental category (DNV GL) temperature B/D, humidity A/B, vibration B and EMC A/B, operation on the bridge or direct operation on combustion engines and compressors
- Certified operation on the bridge, "Compass" certificate (BSH)
- Gateway functions: RS-232/RS-485, NMEA2000, SAE J1939, Modbus RTU and more

Transportation

Whether it's railway vehicles, signal technology or train stations – WAGO is the right partner wherever electricity flows or signals are transmitted and converted in the railway industry.

Our WAGO-I/O-SYSTEM 750 XTR ideally supplements our customer's safety-oriented controls for the implementation of preventative maintenance. Whether on rails or switches, our products fulfill the requirements of railway standards (DIN EN 50121-4, EN 50121-5 and DIN EN 50155) – without application limitations.

Technical Highlights:

- 750 XTR was developed using the strict IRIS railway standard as guidance and complies with EN 50155

requirements:

- EMC resistance per DIN EN 50121-3-2
- Temperature class: TX ($-40 \dots +70^{\circ}\text{C}$)
- Shock and vibration per EN 61373 for 1A and 1B locations
- Voltage fluctuations $0.725 \times U_n$ up to $1.3 \times U_n$ ($0.7 \times U_n$ via external power supply)
- Isolation up to 5 kV of impulse voltage per DIN EN 60870-2-1
- Conformal coating protects all PCBs from moisture, condensation and atmospheric pollutants.

DID YOU KNOW...?

The WAGO-I/O-SYSTEM 750 XTR has been developed to defy extreme climatic influences, vibrations, shocks and surges. For WAGO, only the highest quality will do!

This attention to detail ensures that all relevant standards, guidelines and international approval requirements are met by the 750 XTR Series.

General Specifications

Increased immunity to impulse voltages:

- Modules ≤ 50 V: 510 VAC/775 VDC
- Modules > 50 V: 2.5 kVAC/3.5 kVDC
- Isolation: Rated surge voltage
 - Modules ≤ 50 V: 1 kV (Class VW1 per EN 60870-2-1)
 - Modules > 50 V: 5 kV (Class VW3 per EN 60870-2-1)
- Surge:
 - Modules ≤ 50 V: 1 kV (L - L) / 2 kV (L - E)
 - Modules > 50 V: 2 kV (L - L) / 4 kV (L - E)

Temperature

- Ambient temperature: $-40 \dots +70^\circ\text{C}$
- Storage temperature: $-40 \dots +85^\circ\text{C}$

Condensation

- Short-term condensation per class 3K7/IEC EN 60721-3-3 (except wind-driven precipitation, water and ice formation) is permitted due to conformally coated circuit boards.

Vibration

- 5g per EN 60068-2-6

Standards and Regulations

Vibration resistance:

- IEC 60068-2-6 (5g acceleration)
- EN 61131-2
- IEC 60721-3-1
- IEC 60721-3-3
- EN 60870-2-2
- EN 50155
- EN 61373

Shock resistance:

- IEC 60068-2-27
 - 15g/11 ms/half-sine/1,000 shocks
 - 25g/6 ms/1,000 shocks
- EN 50155
- EN 61373

Immunity to interference:

- EN 61000-6-1
- EN 61000-6-2
- EN 61131-2
- EN 60255-26
- EN 60870-2-1
- EN 61850-3
- IEC 61000-6-5
- IEEE 1613
- VDEW: 1994
- Railway
- Shipbuilding

Emission of interference:

- EN 61000-6-3 and EN 61000-6-4
- EN 61131-2
- EN 60255-26
- EN 60870-2-1
- EN 61850-3
- Railway
- Shipbuilding
