

Leader in Industrial Sensor Technology

Inventors of 1st Proximity Sensor

Pf PEPPER+FUCHS
SENSING YOUR NEEDS

- Inventors of 1st transistor amplifier with an intrinsically safe control circuit
- Noncontact sensors to detect metallic objects at a distance of up to 100 mm
- Print Mark Sensors for high speed switching applications up to 10K/Sec
- Distance sensors from a few centimeter to 300m & accuracy of 0.5mm
- Magnetic sensors offer reliable magnet detection for RPM measurement
- Zero speed sensors for conveyers to detect jamming due to overload
- Sensors for continues level detection of liquids in tanks of 10M height
- Solution for double sheet detection in paper and tile industries
- Rotary encoders with accuracy of up to 0.01° for highest demands on precision
